After inspection, commodities shall have the commodity inspection marks affixed to them.Below is the pattern of the commodity inspection marks:

Printed by the BSMI

| | Applicable to general commodities that are subject to inspection

Printed by the manufacturer in accordance with regulations or by obtaining approval from the BSMI

| | For commodities subject to registration of product certification.E.g. electrics, fire equipment, electronics, construction products, gas appliances, baby products, electrically operated hand tools, personnel protective equipment, etc.

| | For commodities subject to declaration of conformity E.g. computer products, mainboards, inserts cards, etc.

| | For commodities subject to type approval E.g. gas cans, cigarette lighters, etc.

| | For commodities subject to registration of management systems E.g. cement, fire-resistant coating, etc.

| | Printed by manufacturers as approved by the BSMI E.g. toys.

Weights and measuring instruments

| | Weights and measuring instruments passing verification. E.g. taximeters, volumeters, illuminance meters, non-automatic weighting instruments, etc.

| | Weights and measuring instruments passing verification. E.g. taximeters, volumeters, illuminance meters, non-automatic weighting instruments, etc.
